The Problem — Healthcare is Fragmented at Every Step

😰 Before the Visit

Patients arrive with no prior information captured. Doctors repeat intake questions every session.

Language barriers cause missed symptoms and poor communication.

⏳ During the Visit

Waiting rooms are chaotic. No real-time visibility for doctors. Walk-ins disrupt scheduled patients.

Staff rely on paper registers, whiteboards, and phone calls.

🚪 After the Visit

80% of patients receive no structured follow-up after discharge.

Medication non-compliance and missed reviews lead to readmissions.

Doctors have no visibility once the patient leaves.

The Solution — NEXUS: One Platform, Full Patient Journey

NEXUS connects the entire care continuum — before, during, and after the clinical visit — in a single AI-powered platform built for multilingual, resource-constrained healthcare environments.

SIGNAL

Pre-Consult Intake

- Patient completes AI-guided health interview on mobile before the visit.
- Doctor receives a structured multilingual summary.
- Reduces consultation time by 30–40%.

PULSE

Waiting Room & Dashboard

- Live doctor dashboard — appointments, walk-ins, queue management.
- Doctor-initiated video calls for remote consultations.
- Real-time patient status and escalation alerts.

ECHO

Post-Discharge Follow-Up

- Automated care bundle delivered via WhatsApp in patient's language.
- Medication reminders, symptom check-ins, recovery tracking.
- Doctor alerted instantly if patient stops responding.

ORIS Target — Initial Focus

- UAE: 4,500+ licensed private healthcare facilities — JK Clinic live today
- India: 70,000+ private clinics — South India anchor (Bangalore, Chennai, Hyderabad)
- GCC expansion: Saudi Arabia, Qatar, Kuwait — Arabic-first multilingual advantage
- Longer term: Southeast Asia, UK South Asian diaspora clinics

Traction & Validation — Live, Certified, and Growing

Live	267	0	141
UAE Clinic Deployment	API Endpoints Built & Tested	Critical Security Findings (VAPT)	OWASP ZAP Checks All Passed

- ✅ **Product built:** Signal + Pulse + Echo — full NEXUS suite developed and deployed
- ✅ **Pilot live:** JK Clinic, UAE — doctors actively using NEXUS in daily clinical workflow
- ✅ **Security certified:** Full VAPT completed — zero Critical, High, or Medium vulnerabilities
- ✅ **Clinical validation:** AI-generated consultation notes under active MD physician review
- 🔄 **Promoter network:** UAE and India promoter partnerships being formalised (Nov 2026)
- ⏳ **Next clinic onboarding:** Second UAE clinic in pipeline — target Q1 2027

Business Model — Deployment Fee + Monthly Subscription

Hospital / clinic provides infrastructure. ORIS charges once to deploy and monthly to operate.

One-Time Deployment Fee

What it covers	Installation · Docker setup · Configuration · Staff training · Go-live support
India pricing	₹15,000 per clinic
UAE pricing	$400 per clinic
Paid when	On contract signing, before go-live

Monthly Subscription

What it covers	Software license · AI model costs · Azure Speech & Translator API · Support & updates
India — Signal	₹8,000 / month (1–2 doctors)
India — Pulse	₹18,000 / month (3–5 doctors)
India — Complete	₹35,000 / month (6+ doctors)
UAE — Signal	$250 / month
UAE — Pulse	$550 / month
UAE — Complete	$1,000 / month

Go-to-Market Strategy

Phase 1
Now → Q2 2027

UAE Anchor

- Care on US Clinic live — reference customer
- Formalise UAE promoter (Vijayan Nambiar)
- Target 3 more UAE polyclinics
- DHA alignment engagement

Phase 2
Q2 → Q4 2027

India Launch

- Bangalore & Chennai entry via promoter network
- Target ambulatory clinics, 3–5 doctor practices
- NABH alignment for hospital group sales
- 10 signed clinics milestone

Phase 3
2028+

GCC & Scale

- Saudi Arabia, Qatar, Kuwait expansion
- EHR / HIS integration partnerships
- SOC 2 / HIPAA certification for US entry
- Series A fundraise

Why NEXUS Wins — Competitive Advantages

🌐 Multilingual by Design

Arabic, English, Hindi, Malayalam, Tamil, Telugu, Tagalog and more. Not an add-on — built into every workflow from day one.

🔗 Full Journey Coverage

Signal + Pulse + Echo covers intake → waiting room → discharge follow-up. Competitors solve one piece. NEXUS solves all three.

🏥 Hospital Infrastructure Model

Deploys on hospital's own server. No patient data leaves the hospital network. Critical for MOH / DHA / NABH compliance.

🔒 VAPT Certified

Zero Critical, High, or Medium security vulnerabilities. 141 OWASP ZAP checks passed. Ready for enterprise security review.

⚡ Lightweight & CPU-Only

Runs on a standard 4-core VM. No GPU required. Accessible to small clinics and polyclinics, not just large hospitals.

📋 SNOMED CT + Clinical AI

Integrated SNOMED CT terminology, CDS clinical decision support, and AI-generated consultation notes — not just a workflow tool.

Financial Projections — Path to Revenue

Conservative projections based on 10% market penetration across UAE + South India in 36 months.

2027 (Year 1)	2028 (Year 2)	2029 (Year 3)
Clinics	**Clinics**	**Clinics**
10 clinics	**35 clinics**	**80 clinics**
Annual Revenue	**Annual Revenue**	**Annual Revenue**
₹18L / $22K	**₹63L / $76K**	**₹1.44Cr / $174K**
Profitability	**Profitability**	**Profitability**
Breakeven	**+₹20L profit**	**+₹60L profit**

Revenue mix: 70% monthly subscriptions · 30% deployment fees
Average revenue per clinic: ₹18,000/month India | $550/month UAE

The Ask — Seed Round

Raising

SGD 500,000 (~$375K / ₹3.1 Crore)

Seed Stage · Equity · Company Valuation: ₹5 Crore

- **40% — Sales & Market Expansion** — UAE clinic onboarding team, India promoter network, marketing and demo infrastructure
- **30% — Product & Engineering** — EHR integrations (HL7/FHIR), mobile app, multilingual model fine-tuning, HIPAA/SOC2 prep
- **20% — Clinical Validation & Compliance** — NABH / DHA regulatory alignment, MD advisor clinical dataset review, VAPT annual renewal
- **10% — Operations & Infrastructure** — Azure cloud costs, legal, MOU / contracts, finance and admin

Team

Nehru Raj

Founder & CEO · ORIS Health Technology

- Built NEXUS end-to-end — full-stack AI clinical platform
- Deployed live at JK Clinic, UAE — operational pilot
- VAPT-certified security implementation
- Azure Speech, SNOMED CT, Ollama LLM, multilingual NLP integration
- Active outreach across UAE, India, and US healthcare networks

Advisory & Clinical

MD Clinical Advisor

Practising physician overseeing clinical dataset validation and AI-generated note accuracy review

Giovanni A. Amato

Chairman Emeritus & Strategic Advisor — Health Services & Integrated Networks, Chicago, USA

UAE Market Partner

Senior UAE business executive — active promoter network across Dubai healthcare sector

Healthcare technology must ultimately serve a greater purpose.

Improving how care is delivered.
How professionals work.
How patients experience the system.
